CANVAS INTEGRATION

Regroup Mass Notification

Regroup Mass Notification is an award-winning, cloud-based platform for emergency and day-to-day mass communications. Regroup's seamless integration with Canvas equips educators and administrators with a powerful emergency communication tool that can reach thousands of people in seconds via SMS/text, email, voice calls, and more. It also enables routine text and email notifications to be sent from within the familiar Canvas platform, eliminating learning curves and improving daily communications between instructors, staff, students, and parents.

BENEFITS OF REGROUP'S CANVAS INTEGRATION

EMERGENCY PREPAREDNESS
Send up to 65,000 text messages in just 60 seconds, reaching students, faculty, staff, and parents instantly with important information during an emergency

SIMPLE DATA MANAGEMENT
Seamless database integration between Regroup and Canvas means you don't have to duplicate data or update records multiple times

NO TRAINING REQUIRED
Instructors can text and email students without ever leaving the Canvas platform, eliminating the need for additional training

GROUP & MASS COMMUNICATION
Group your recipients any way you need to reach them all at once with a single message
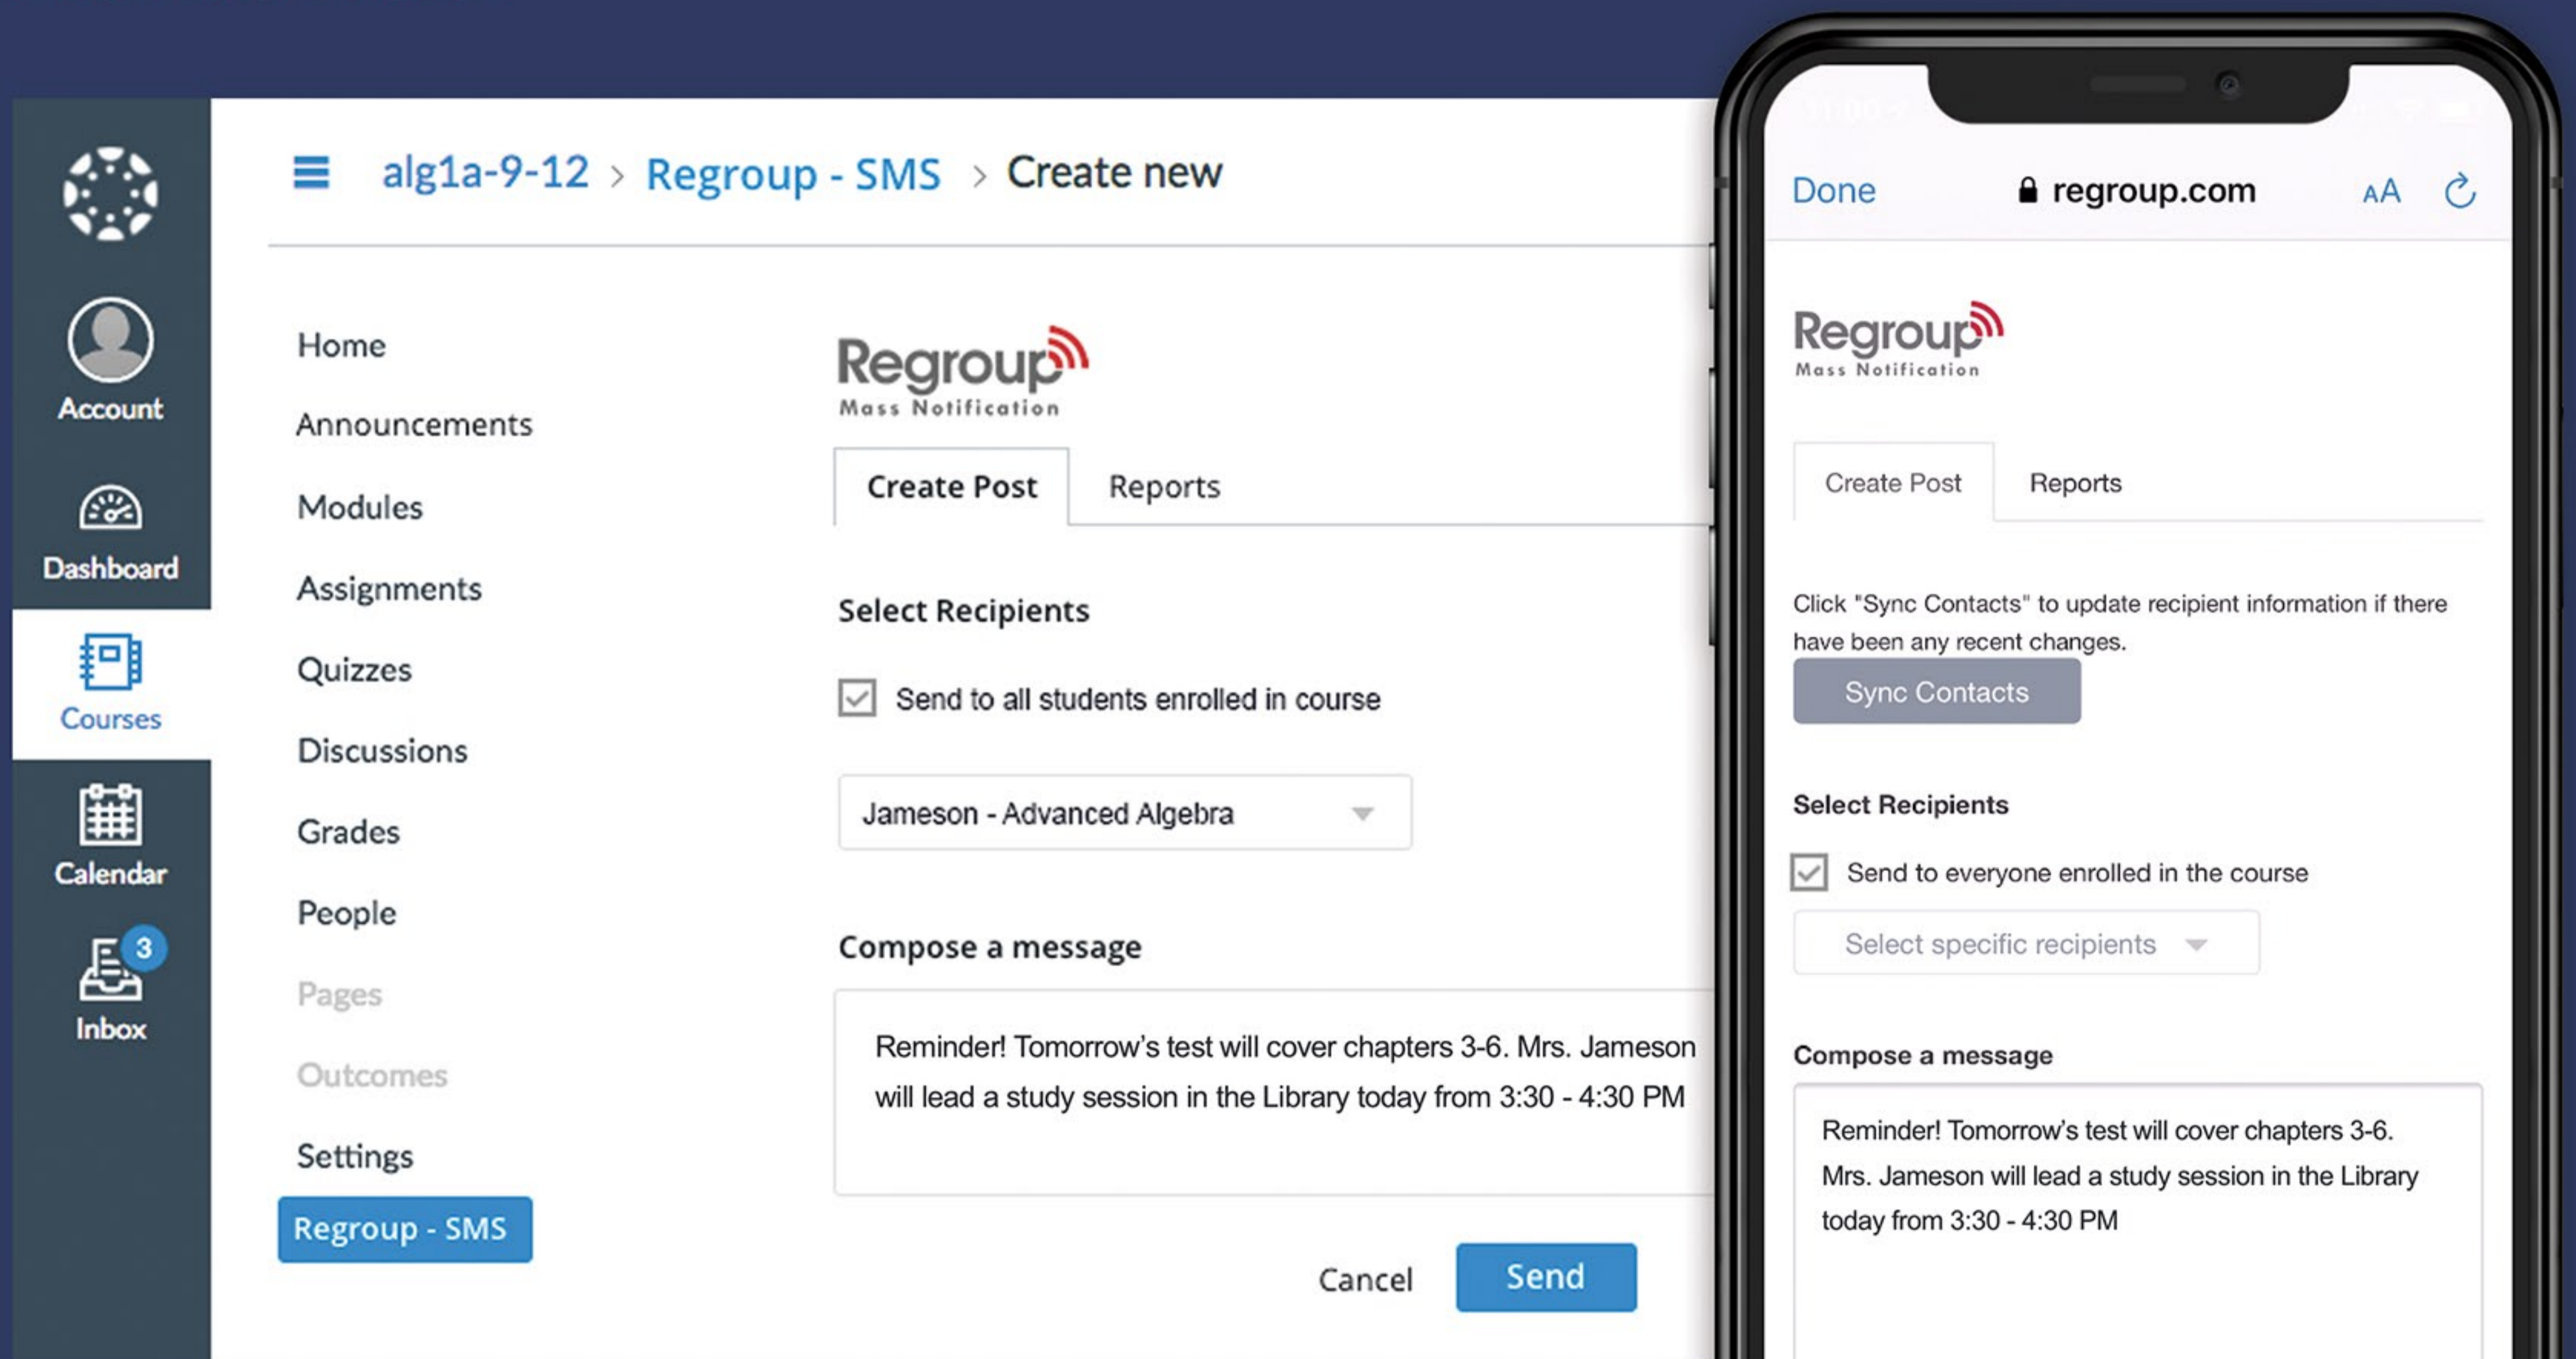

DETAILED REPORTS
View message delivery status and other details immediately

TEXT MESSAGE UPDATES, NO APP REQUIRED

Send SMS/text messages directly from the Canvas dashboard to your students, parents, or other recipients. They don't have to download an app or learn a new system to get the important information you want to send. Use it for:

Class schedule changes . Quiz and test reminders . Parent communications
And much more!

EMERGENCY PREPAREDNESS

Get full access to Regroup's emergency notification platform to be prepared for the worst:

COMMUNICATE FASTER

Two-tap Quick Message templates enable fast notifications when seconds count

TIPSAFE REPORTING

Encourage students and staff to report suspicious behavior or safety concerns

GEOFENCING

Deploy messages to specific locations to keep people away from a danger zone, or tell them whether to shelter in place or evacuate
