

REGROUP MOBILE

The Mobile App That Keeps Your Entire Network Together

Take the power of Regroup Mass Notification with you

Regroup Mobile is a free app enabling organizations like businesses, healthcare and schools to keep their people, property and continuity secured during emergencies and other critical events. It also helps them to quickly send routine communications to entire networks or specific groups of individuals. It's the robust, reliable communications solution from the most trusted name in mass notification.

Regroup Mobile informs your networks and empowers your admins – everywhere they go.

REGROUP CLIENTS

For Regroup Mass Notification clients, Regroup Mobile is the one app for sending and receiving messages for all users. Regroup Mobile empowers admins, leaders and staff to quickly and easily access the full power of Regroup's platform from anywhere on their iOS and Android devices.

Simplified Communications Your Way

Unlike typical text messaging, Regroup Mobile allows admins to reach specific groups of individuals or entire networks. Send urgent notifications via email, SMS, call/TTS, MS Teams, social media, RSS, alarm and siren activations, digital signage, desktop notifications and more.

Two-Tap Emergency Alerts

When seconds count, Regroup Mobile's pre-programmed QuickMessage Templates help you reach people fast –with only two taps. System administrators can create a complete library of templates, ready to use in virtually any situation.

Two-Way Messaging

Get replies from recipients and see them in real-time or use it like a group-chat feature. This gives system administrators the tools to take fast action to inform the team and ensure their safety.

Bulk Replies and Updates

Regroup Mobile allows admins to select multiple recipients for bulk replies and updates. You can also select recipients in bulk, based on their response to the original notification.

In-App Reporting

View detailed delivery statistics from the entire network on your mobile device. Reports are also saved and available in your Regroup cloud-based platform.

Robust Security

Enable multi-factor authentication, single sign-on or screen lock. Turn on biometric login through fingerprint or face recognition to prevent messages from being sent by unauthorized users.

MESSAGE RECIPIENTS

When you're part of an organization using Regroup Mass Notification, you can download the free mobile app, customize your alert preferences and communication experience.

Get The Word - Every Time

Alerts can be delivered to your device with an active data or Wi-Fi connection, even when local cellular networks are overloaded and cannot handle SMS or voice calls. Never miss another important message.

Location-Based Alerts

With Regroup Mobile, recipients can receive messages when inside or interacting with a Geofence area. This keeps you safe and informed in critical situations in your area.

Easy Configuration

Configure Regroup Mobile to your liking with customized notification preferences, contact information and more.

GET IT ON
Google Play

Download on the
App Store

Download Regroup Mobile today and get the innovative solution thousands of organizations have trusted to keep their networks safe, informed and in the loop.
