

# UNIFIED COMMUNICATIONS for BANKS and the FINANCE INDUSTRY

## ADVANCED OPERATIONS AND COMMAND CENTER IN A SINGLE PLATFORM

Regroup is the award-winning solution for sending critical and routine mass alerts to key stakeholders. Our secure, easy-to-use, and reliable platform enables financial services companies and banking institutions to assess preparedness and address unforeseeable emergencies, thereby ensuring business continuity and operational resilience.

“Notify an entire company in seconds” - System Administrator

## ENHANCE COMMUNICATIONS, MAXIMIZE YOUR IMPACT

Keep everyone within your department informed on critical information and communicate with your communities better than ever before.

### Routine Communications

- Coordinate and manage contract processing with team members
- Communicate policy updates and product changes
- Inform staff of facility safety standards or protocols
- Stay in touch with traveling employees
- Create contact and admin groups with different permission levels
- Use custom templates for faster notifications
- Coordinate drills, reminders, check-ins, and more

### Critical Communications

- Automate severe weather notifications from NOAA/NWS, FEMA, and IPAWS
- Use for event/incident escalation
- Send network-wide and targeted alerts for suspicious activity
- Enable two-way communication for everyone
- Report IT issues, outages, or other operational issues
- Increase situational awareness with geo-targeted messaging
- Integrate with alarm and public address systems

# EASILY SEND IMPORTANT UPDATES

Regroup gives banking and financial services professionals the ability to send important notifications through various integrated delivery methods. We go above and beyond traditional communication methods by providing advanced customization, comprehensive reporting, geo-targeted alert technology, and simplified two-way communication via our mobile app.

WAYS TO SEND

  
Regroup Website

SOME OF THE WAYS TO RECEIVE

  
SMS

  
Phone

  
PA Systems

  
Email

  
Desktop Notifications

Easily create unlimited groups, administrators and templates in the system to organize the contacts you need to reach. Organize contact data in the way that makes the most sense to your organization. Groups can be used to show organizational hierarchy, differentiate internal and external data or segment contacts by any other identifier that’s useful to you (for example ZIP codes, roles, on-site vs remote, and more).

TOP FEATURES FOR THE FINANCE INDUSTRY

  
Unlimited Groups

  
Free Mobile Apps

  
Multi-Facility Management

  
Unlimited Admins

# INTEGRATE SYSTEMS, AUTOMATE PROCESSES

Banks, credit unions, and other financial institutions need flexible solutions. We understand the importance of being able to integrate your existing systems and databases with our platform to maximize efficiency.

## REGROUP CAN BE INTEGRATED WITH ALMOST ANY API-CAPABLE THIRD-PARTY SYSTEM.

Simply ask our Customer Success team how Regroup can be integrated with your specific systems or tools.

### AVAILABLE INTEGRATIONS

- ✓ Active directory
- ✓ Alarms and notification hardware
- ✓ Desktop alerts
- ✓ Databases & information systems
- ✓ National Weather Service/NOAA alerts
- ✓ Integrated Public Alert & Warning Systems (IPAWS)

Regroup supports three of the most common SSO protocols, SAML, LDAP/LDAP/S, and CAS. Using Regroup can help your institution meet with the rising expectations of the FDIC, FFIEC and your valued customers.

During a routine business day, Regroup provides your institution with a faster suite of tools for getting day-to-day and planned messaging to your team. And, in the event of a critical situation, Regroup allows you to immediately alert others to potential danger.

## LEARN MORE

With Regroup Mass Notification, banking and financial institutions can improve efficiency and safety, communicate more effectively, and minimize risk for employees and customers.
