CUSTOMIZED FORM FIELDS

Enhanced Precision in Emergency Alerts with Custom Form Templates

THE CHALLENGE

In emergency situations, dispatchers face the challenge of communicating vital information rapidly while adapting to the unique details of each incident.
The complexity increases with the need to maintain consistency across messages, minimize manual errors, and adjust content for specific scenarios without creating new templates from scratch.

THE SOLUTION

To address these challenges, our solution leverages intelligent form-based templates that are both customizable and adaptable. These templates come equipped with pre-configured fields, allowing dispatchers to swiftly tailor messages to the specific details of an incident without compromising on the accuracy or consistency of the communication.

CUSTOMIZABLE, FAST AND EASY

Customized Form Fields are the best way to send notifications quickly and easily.

ADAPTABLE FORM FIELDS

Customize templates with adaptable form fields that ensure all necessary incident-specific information is captured clearly and concisely.

PRE-CONFIGURED OPTIONS

Utilize a library of pre-configured options that can be quickly selected to match the nature of the emergency, simplifying the message preparation process.

CONSISTENT MESSAGING

Maintain consistency across all communications with standardized templates that reduce the risk of errors and ensure clear, precise messaging.

EASY CREATION AND MODIFICATION

Customized Form Fields can be created and managed in just a few minutes from Channels —> Templates —> Form Fields.

TRUSTED BY KEY INDUSTRIES

DISPATCH CENTERS
For orchestrating rapid response with precision.

AIRPORTS
Customize templates with adaptable form fields that ensure all necessary

AIRLINES
Customize templates with adaptable form fields that ensure all necessary

Regroup's customizable form templates are specifically designed to support the unique communication demands of these sectors, showcasing our commitment to delivering solutions that enhance operational efficiency and safety
