

REGROUP DESKTOP NOTIFICATIONS

Powerful, Discreet, and Impossible to Ignore

Regroup's Desktop Notification software enables you to send critical and routine messages to your organization's existing computer infrastructure to reach employees in a discreet yet powerful way that cannot be ignored. In just a few clicks, administrators can deploy life-saving alerts to desktop computers and laptops.

Paired with Regroup's robust communication platform, you will be able to distribute your message via desktop notifications, email, text, voice calls, mobile app, RSS posts, social media, and various other integrated delivery methods with just a few clicks.

- ✓ Send HTML Rich-Text messages
- ✓ Ready-to-use alert templates
- ✓ Custom branding for messages
- ✓ Option to cancel current alerts
- ✓ Sync group and contact data from Active Directory or your Regroup account

HOW CLIENTS USE DESKTOP NOTIFICATIONS

CORPORATE

Keep everyone informed of company announcements and improve reception-desk safety.

HEALTHCARE

Alert response teams, staff, common areas, and visitors of emergency situations or incident color codes.

K-12 AND HIGHER ED

Target faculty, staff, and students simultaneously, informing them of emergency situations, severe weather, school events, parking or traffic issues, and more.

FACILITY OPERATION

Inform employees even when emails are down, about policy changes, compliance updates, data breaches, facility best practices, and more.

CLOUD-BASED SOLUTION, EASY INSTALLATION

Regroup's Desktop Notification solution is unique because it's a 100% cloud-based platform that doesn't require on-premise hardware to send notifications. It can easily deploy messages to computers and systems connected through your organization's intranet, or any computer with an internet connection. It's perfect for large organizations, especially those with remote or field-based employees.

Best of all, the software installation that enables Regroup's Desktop Notifications is compatible with most common desktop management tools and mass deployment installers, so onboarding and configuring everyone's devices is an easy task – even if computers are unattended.

HOW IT WORKS

INSTALL

Install the Regroup Desktop Notifications software on your organization's existing computer infrastructure. Use common desktop management or mass installation tools for fast, easy-to-manage deployment.

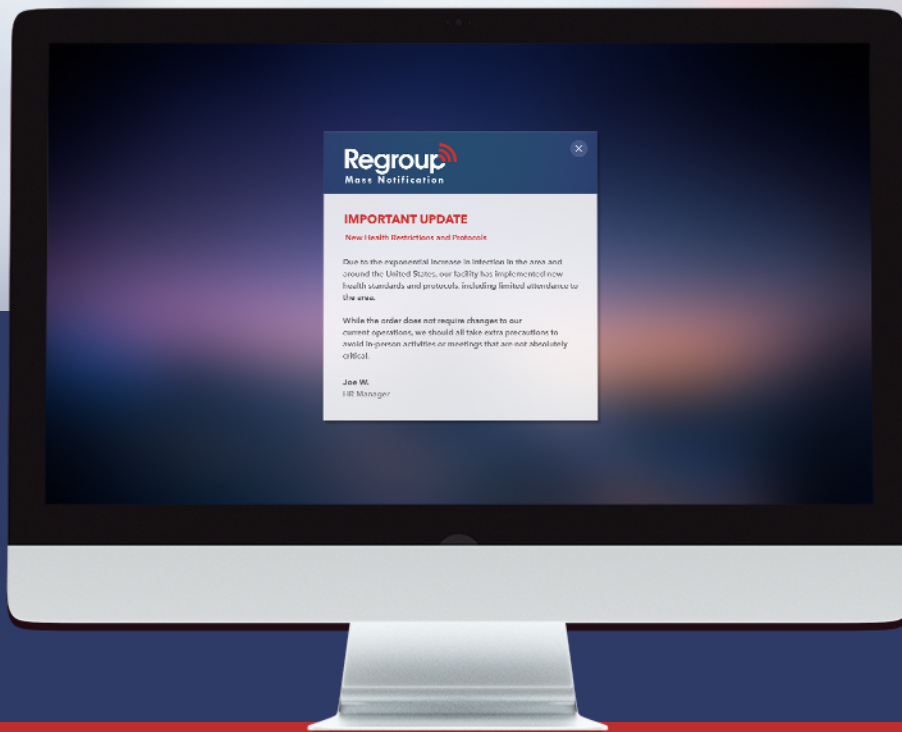

CONFIGURE

Add custom branding, set up your templates, and configure your cloud-based desktop notifications account to meet your organization's needs. Our flexible options make it a versatile tool for any structure and use case.

SEND

Deploy notifications quickly and easily from within your Regroup account to target specific groups or your entire organization. We can deliver messages to up to 150,000 workstations each minute!
