

# SINGLE TENANT

Protecting Customer Data  
and Privacy

## THE CHALLENGE

Mass notification systems require the storage of large amounts of private data.

Subscriber information breach is a serious concern for every organization and can be addressed with secure management of sensitive data.

## THE SOLUTION

Regroup provides a single-tenant environment ensuring no unauthorized sharing of data occurs.

Each contact's data and interactions are hosted on a server exclusive to that client with no data sharing, providing a more robust hedge against data breaches.

## THE MOST SECURE ENVIRONMENT FOR DATA AND CONTACTS

### SECURITY

Increased security as each user's data record is completely separate from all others.

### RELIABILITY

Singular records ensure data accuracy and improved software performance.

### FULL CONTROL

More flexibility for user customization, feature choices and updates.

### EASE OF RESTORATION AND MIGRATION

More control over backups and recovery. Fewer complications when data is migrated.

**“Regroup Meets our needs and exceeds our expectations.”**

— David A | VP, CIO - Enterprise

Since 2006, Regroup Mass Notification has provided a cloud-based, multi-channel mass notification platform for emergency and routine applications. Serving the educational community, enterprise, manufacturing, finance and government, Regroup's continual pursuit of excellence has made it the most trusted name in mass notification and a leading-edge provider of smart communication solutions for clients throughout North America.
